

## The Open Dermatology Journal

Saturday, July 14, 2007

**Dr. J. Lisziewicz**  
**Res. Inst. Genetic and Hum. Ther.**  
**Washington, DC 20007**  
**United States**

Dear Dr. Lisziewicz

Bentham Science Publishers have gained a longstanding international reputation for their excellent standards and top quality science publications. Many journals published by Bentham Science Publishers have received high impact factors in their respective **fields**. For **the** current list of publications, please visit [www.bentham.org](http://www.bentham.org) [<http://www.bentham.org/>](http://www.bentham.org/). Seven Nobel Laureates have endorsed a number of Bentham Science's journals; please read their quotes at [www.bentham.org/Nobel.htm](http://www.bentham.org/Nobel.htm) [<http://www.bentham.org/Nobel.htm>](http://www.bentham.org/Nobel.htm)

The publishers are now undertaking a new publication venture by launching a number of Open Access journals in 2007, devoted to varied disciplines in the fields of science and technology.

Open Access Journals are freely accessible via the Internet for immediate worldwide, open access to the full text of research articles for the best interests of the scientific community. All interested readers can read, download, and/or print any Open Access article at no cost. There are no subscription fees for Open Access journals. The modest Open Access publication costs are usually covered by the author's institution or research funds. Moreover, authors who publish in our Open Access journals retain the copyright of their article. Open Access journals are no different from traditional subscription-based journals; they undergo the same peer-review and quality control as any other scholarly journal.

There are three Open Access journals in the field of Dermatology, which will publish

Research, Reviews and Letter articles and categorized as follows:

The Open Dermatology Journal  
Open Dermatology Letters  
Open Dermatology Reviews

The journal aims to provide the most complete and reliable source of information on current developments in the field. The emphasis will be on publishing quality articles rapidly and openly available to researchers worldwide. All published articles will be deposited immediately upon publication in at least one widely and internationally recognized open access repository (such as Medline, PubMed Central). Moreover, all articles are indexed by Google and Google Scholar, therefore providing the maximum exposure to the articles.

**The journal will be essential reading for scientists and researchers who wish to keep abreast of the latest developments in the field. The publishers are confident of the journal's rapid success.**

Based on your record of contributions in the field of Dermatology, I would like to invite you to submit to me your CV with current list of publications so that we may consider you as a possible **Editorial Board Member** for the three journals.

As an editorial board member, you may be required to occasionally review research papers, solicit articles from your colleagues/acquaintances and help promote the journal at conferences and meetings that you attend. Submissions of manuscripts to the journal from Editorial Board **Members will** receive a discount of 50% off the total publication charges.

I hope you will accept my invitation to join the editorial board of the journal, **in which case could you kindly send** us your reply by email to [todj@bentham.org](mailto:todj@bentham.org) or alternatively to [madiha@benthamscience.org](mailto:madiha@benthamscience.org)

I look forward to hearing from you soon.

Best regards,

Yours sincerely,

**Matthew Honan, PhD**  
Editorial Director
